

Before Satellite Radio should be hendered, the FCC should think of the people that can only get radio broadcast via Satellite radio. The Stations that are trying to hender Satellite Radio need to think about those that cannot get their signal. and the only way to warn of any emergency situation be it a Traffic Accident or a Huricane would be via Satellite Radio. There are people that do not live in the Urban areas. and the only way of communication Telephone, Television, and Radio is via Satellite. We cannot forget about them.
